

Submitter: Rebecca Arnold

On Behalf Of:

Committee: House Committee On Behavioral Health

Measure, Appointment or Topic: HB4083

I oppose this measure as all Social Workers do not work in mental health. Social Workers are vital to many fields and should not be assumed to always be in the mental health field. I am also concerned that allowing Social Workers to be supervised by other disciplines, we may lose a very important connection to Social Workers values which are vital to the profession.
