House Committee On Climate, Energy, and Environment

Measure, Appointment or
Topic:

HB4080

I strongly support HB 4080. Many Portland residents do not "own" access to their roofs, or have roofs that are not appropriate for solar installations.

I own such a house which I rent out. If this bill becomes law, I intend to provide 1200 Watts of solar energy to my tenants at no charge to them. My own home, at 5616 SE 56th ave, already has a large solar installation on the roof.
