

Submitter: David Lewis

On Behalf Of:

Committee: House Committee On Transportation

Measure, Appointment or Topic: HB4007

I am a resident of Portland. I am 77, and an active e-bike and bicycle user. The current lack of regulation has meant that devices that are clearly unsafe have become available, with no way to enforce standards. This legislation will both promote safety and allow legitimate dealers and users to know what they are getting. In addition, it will help keep unsafe devices out of the hands of vulnerable teenagers, and encourage training and safe use.
