

Submitter: David Lewis

On Behalf Of:

Committee: House Committee On Transportation

Measure, Appointment or Topic: HB4007

I am a 77 year old resident of Portland. I use both bicycles and e-bikes as a regular part of getting around the city. Without regulation and enforceable standards, we see dangerous devices being sold to people who do not know what they are getting. This creates danger for users and makes legitimate dealers and users lives more difficult. I encourage you to pass this reasonable regulatory framework, so that we have clear and enforceable standards for everyone's safety.
