Measure, Appointment or Topic:

HB4145

G

House Bill 4145 is another manipulation to gain control over Oregons populace by making it more difficult to possess a firearm. When Oregon is a safe haven for illegals under illegal sanctuary laws and the state mismanages money so the homeless population is at a record high...you want to vote to make it more difficult and more expensive and take longer to have access to the rights given to us in the US Constitution? You don't think you are to declare this an emergency and push this through with your supermajority given to you by your illegal sanctuary state and fraudulent elections. This whole state is Red and you and your blue mindset have destroyed Oregon. It is time for this era of incompetence to end. If you push this through, it will be destroyed in the Supreme Court. You can't just infringe on United States citizens rights by disallowing federal agents to do their job or take guns from people that think differently than you. Whose side are you on? Americas side...or are you on the side of illegals and socialists who want government to be so big that no one is safe and completely reliant on government? You have not stepped up to help protect our rights, but instead try to tax us and take our rights away. Why should we have to pay more to be permitted to have the right that has already been given to us? We have the right to arm ourselves to protect our families from your failed liberal policies. Here is a simple solution to all the money problems in Oregon so you don't have to charge gun owners more money, or take state park benefits from disabled veterans, or throw education in our faces as a way to guilt us into accepting tax increases...stop spending money on protecting criminal illegals (every illegal is criminal for being here illegally), get rid of all the DEI hires and representation for a small amount of mentally ill people, get mental health back into this state so the people who are on the streets can actually be helped off the street, stop fighting federal agents with taxpayer money and let them help clean Oregon up so we can spend money on programs that help Oregonians, stop the sanctuary laws that prevent law enforcement from easily deporting and handing over criminal illegals to federal agents so we can be free from the draining taxes to support them, get Kotek out of here because she has helped ruin this state and make the democrat party to be proud of who they are instead of inciting riots and being against everything good in this country. Stop hurting citizens to run towards socialist communist stagnation. We want to be free, not controlled. This bill is about control. Stop controlling us. I oppose any of these unconstitutional measures.
