Committee:

House Committee On Judiciary

Measure, Appointment or Topic:

HB4145

As Gun Violence is now the number 1 cause of death for children, I support HB 4145 as a reasonable way to implement Measure 114, and yes, I actually read the posted synopsis and parts of the text of the bill.

The proposed changes seem to address opponents concerns by making data private, providing a longer time period for obtaining a permit, increasing the fee to cover the influx of background checks, and providing some options for obtaining the mandated training course.

Measure 114 and the modifications specified in HB 4145 are NOT trampling on the rights of gun owners and are lawfully regulating high-capacity magazines of crowd-killing weapons.

The implementation of waiting periods is especially important in the prevention of suicides and in keeping firearms out of the hands of those who could not pass a background check and seek to bypass those checks thru some of the gun show loopholes that currently exist.

Please pass this bill to help keep Oregonians safer.
