House Committee On Judiciary

Measure, Appointment or Topic:

HB4145

I think this is wrong, why should conceal carry prices be raised it's our 2 amendment right to protect ourselves. The people how have there conceal carry, went through all the necessary processes to gain the right to conceal carry. It's already ridiculous enough that we have to pay some small amount for this basic right let alone raise the prices and taxes. I stand against trying to modify measure 114. Taxes are already high enough and making it day today is hard enough, it doesn't make since to make life harder for the common person, to live and protect their loved ones.
