

Submitter: Kelli Pellegrini

On Behalf Of:

Committee: House Committee On Behavioral Health

Measure, Appointment or Topic: HB4028

I am a clinical psychologist in a group private practice in Milwaukie OR. HB4028 provides important provisions that will allow me to continue to provide impactful mental health services to citizens of Oregon with less disruption from costly (time and money), unfair and manipulative tactics of health insurance companies who use audits, reviews and other mechanisms to unfairly limit, restrict and clawback payments for services. The bill also improves mental health parity in Oregon, which needs protection in light of the federal government failing to do so. I support the bill in its entirety.
