Measure, Appointment or Topic:	HB4007

I believe that any device that can travel more than 20 mph should not be allowed to use bike paths. I have a pedal assist e-bike and my speed never exceeds 18 mph. There should be rules around electric bikes that are not pedal assist as they are way too fast to be safe traveling in bike pathways. I think there should be consequences for electric scooters that continue to ride on sidewalks endangering pedestrians and I also think that e-scooters should be fined for endangering bicyclists in bike paths. Also, mobility scooters and electric wheelchairs should have limits to the speed they can travel.
