HB4088

I STRONGLY OPPOSE this bill.

To the legislators who wrote this bill, do you have children? I wonder because this bill would cause Oregon to be a sanctuary state for permanent, body-altering procedures on minors and cause the stripping of parents rights of their role in shielding and protecting their children, ultimately giving providers carte blanche on experimental surgeries and medicines without accountability.

If you are a parent and do have children, I question your role as a parent to those children of those who support this bill. Who in their right mind would let a child drive a car down the street? Who in their right mind would let a child make life altering decisions when they aren't old enough to drink, to drive, to vote, etc? They are children. Do you know the definition of a child? They are still forming their bodies and their minds. There is a reason children are not allowed to have alcohol or responsibilities of driving or voting.... it's because they are CHILDREN!

I question those who desire to push through legislation such as this and their ulterior motives for continuing to think that allowing children to make life altering decisions such as this and negating the rights of the parents to be a parent to a child preventing them from doing such a thing. Who are you and why are you doing this to children?

This is just wrong and under no certain terms would I ever think that the people behind this bill has a child's best interests at heart. This is just another attack on the parents of children. It's time this stops.

Vote NO to this insane attempt to continue to justify the mutilation of Oregon's children with experimental procedures that make life altering changes to their bodies.
