

As a parent of two high school students in Oregon I support HB4125. Year after year funding has been cut in our public schools. Our children are the future of Oregon and they deserve a quality education. Oregon's outdated revenue system does not provide students with the education they deserve. Especially now with cuts in funding from the federal government we need to prioritize our kids. We must support the Revenue Forecast Modernization Act. This will revise the tax rebate known as the "kicker" to ensure funds don't get concentrated with the wealthiest who need it least and the revenue can get redistributed in a way that supports public education and in turn our local economy. Thank you!
