

Submitter: k d

On Behalf Of:

Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB4138

I support HB4138. As a retired clinical social worker, I can assure you that the ongoing traumas being experienced directly, indirectly and intergenerationally will impact the mental health of U.S. residents, relations and onlookers for generations. Knowing that unidentified people can assault and abduct citizens and residents from the streets, their cars, businesses, or homes is outrageous. Not only are so called federal agents brutalizing us, but imposters are as well.

Further, we know that when people are able to conceal their identify they do not have the same level of self consciousness we rely on to guide our behaviors. The collective actions of 'agents' further increases herd mentality -- unfortunately in this case, it increases violent herd mentality. The risks of this continuing escalate the dangers go us all.

HB 4138 allows us some protection. Pass this bill and let Oregon voters decide whether to move forward in implementing these protections.

Thank you.
