| Measure, Appointment or Topic: | HB4088                       |

On behalf of Bradley Angle, the first domestic violence shelter on the West Coast, and now in its 51st year, we support HB 4088. We know how important access to reproductive health care and gender-affirming care are, especially for survivors of domestic violence and sexual assault, and we are proud of the ways that Oregon has stood up for the rights of folks to access the care that is right for them. We believe in the safety and autonomy of survivors, and trust that they know what they need for their families, bodies, medical care, and path to recovery. By ensuring reproductive rights and gender affirming care are protected in Oregon, we can help survivors of domestic violence and sexual assault, get access to the care, compassion, and choice that they deserve - along with the rest of Oregonians.
