RE: Testimony in Support of SB 1570-1

To the Senate Health Care Committee:

I'm writing to support SB 1570-1, The Healthcare Without Fear Act.

[In Oregon, more and more immigrants are delaying care for themselves and their dependents,](#) putting people at risk of worsened health, greater caretaking burden in the home, and increased fear and isolation. Hospitals and federally qualified health centers should be trusted places for all Oregonians, regardless of immigration status, to receive care.

Thank you for considering this testimony, and I look forward to your support.
