House Committee On Revenue

Measure, Appointment or Topic:

HB4125

Calculating the required taxes for our state has been a problem for far too long. Hence why we have the kicker. Oregon PERS has been a problem for far too long as well. Investments need to be made to create a considerable return to fill the funding gap of unfunded liabilities. It should not fall onto schools and state agencies to use their budgeted dollars to give back to purse for that funding. Straighten prayers out, straighten out the tax system, and hands off our kicker..
