HB4145

Once again Democrat legislators are attacking our Constitutional rights which will have no affect on criminals or general public safety!

HB4145 will do nothing but hurt responsible, law abiding individuals by placing undo burdens on their ability to defend themselves.

This bill will also disproportionately affect low income people and most specifically the BIPOC communities who do not always have the disposable income necessary to accommodate this bill if they choose to purchase a firearm.

These are the same people that you Democrat leaders claim to want to help.

If you pass this, it will show that you only care about the BIPOC communities when it's convenient for you.
