Measure, Appointment or Topic:

HB4145

Hello,

This bill is full of issues. 1st it requires a permit yet there is no system set up causing people who are wanting to exercise their second amendment right to be unable to do so. This leads me to the 2nd point of which there is no due process when denied a permit due to clerical information being unable to be found which is no fault of the person going for the permit. This leads to my 3rd point of having no standards yet requiring people to pass standards. How can they pass something that does not exist? Finally this will do nothing in actually curbing gun violence yet cost more money. Thank you for your time. God bless.
