House Committee On Revenue

Measure, Appointment or Topic:

HB4125

I oppose any change to the Oregon Constitution surrounded around the kicker due to the fact that we are one of the highest taxed states in the United States that kicker tax refund helps families that are struggling every other year with a little extra money we've got price surging we've got housing surging we've got businesses leaving the state of Oregon taxes are climbing even higher and higher our own government in Oregon does not listen to the people you only listen to your own party the Democratic Party the whole Transportation Bill tax is proof that the Oregon government even the governor does not listen to the people of Oregon we need to cut taxes so that we can start getting businesses into Oregon so that we can start lowering taxes across the board due to the fact the economy is growing we need to change building codes so that certain places like Klamath Falls can actually grow so that we can get more local businesses Per County we need more private housing not apartment complexes but private housing and most importantly we need our government of Oregon to listen to the people not their party
