Committee:

House Committee On Judiciary

Measure, Appointment or Topic:

HB4145

This is a blatant infringement upon my second amendment rights. This bill (and Ballot Measure 114) uses only selective data to come to it's conclusions that these restrictions would be effective. It is asinine to approach this subject when our cities and state are being affected so heavily with rampant drug use and a severe mental health crisis. Along with these societal ailments, we do not have a public prosecutor team that is willing to prosecute and punish the criminals that we have. Measure 114 and the modifications will not affect criminals, and is simply based upon emotional redress.
