

Submitter: Jordan Curtis

On Behalf Of:

Committee: House Committee On Behavioral Health

Measure, Appointment or Topic: HB4028

I am a professional counselor associate working from Portland Oregon. I support HB4028 and the work to reform insurance clawback measures and create transparency in the industry. I have been negatively impacted by insurance clawbacks due to minor administrative errors, some of which were on the part of the insurance company itself. Such clawbacks have cause me much stress, time, and energy. Myself and many colleagues who work in the mental health field and take insurance work in fear of clawbacks based on unclear and subjective guidelines, which detracts from client care. Please support this bill and help create more financial predictability and safety in our mental health workforce to support our workers and the clients we serve.
