

Submitter: Andrew Mancini

On Behalf Of:

Committee: Senate Committee On Early Childhood and  
Behavioral Health

Measure, Appointment or Topic: SB1573

This is common sense to not locate drugs nearby to schools. Our children are being exposed to things that no child should ever have to see. Oregon has significant work to do in this regard, but please support a bill that is about as non-controversial as it can be in this space. It is a significant safety risk, not to mention the mental trauma that is created by seeing drugs so up close. Please vote in favor of SB 1573.
