Measure, Appointment or Topic:

SB1583

We need to safeguard components of measure 110 so that we can protect all the progress that is made with building treatment centers getting people into treatment the community livability teams that are all over the county more money actually needs to go into this program I'm a recovered addict myself watching clients be able to have access to resources and treatment and Aftercare and all of the other extenuating Aftercare programs that are available in the communities like peer support case management all those things that are needed to help a recovering person be successful the first year to 2 years of a person's life in recovery is the most scariest they're trying to live a life with dealing with their problems being healthy in the community making healthy choices while seeing all the death and destruction of all of their friends and everything that goes on in the communities like people on the streets hunched over because they're high on Fentanyl it really takes time for a person in recovery to get their legs really under them so that they are solid and secured and then if you add the co-occurring mental illnesses that are associated with the majority of it Rehabilitation takes longer so I'm asking you to please Safeguard measure 110
