House Committee On Revenue

Measure, Appointment or Topic:

HB4125

I am in support of utilizing kicker funds to support schools. Our schools are painfully underfunded, we cannot keep shortchanging our children for immediate gratification. We have the least in class days out of all the states and our graduation rates are only at 85% because we've relaxed all requirements, this class is not ready for the demands of college after having next to no homework and always being able to make things up later. We have to better for teachers and students.
