HB4125

This matters a lot for education, wildfire response, roads, and other core services our state desperately needs. I fully support this bill. It is ridiculous that we have this kicker when we have failing public services. I have two kids in our public schools and one is a kindergartener with 29, yes 29 kinders in her class because we do not have enough funding for another teacher. We are failing our future and we need to fix funding in our state. This is an important step in the right direction.
