House Committee On Agriculture, Land Use, Natural Resources, and Water

Measure, Appointment or
Topic:

HB4153

It's a fundamental right for the people to provide for themselves and their community. This bill is an infringement upon all of our rights and is a clear money and power grab by the large corporations to eliminate outside "threats". This is why the nation is morbidly obese and in such ill health. But that's by design and apparently these few small family farms are somehow a threat to the overall picture. I moved to Oregon to enjoy the beauty, nature and fresh farm raised food. If we can't have that then what's the point of living in "the greatest nation in the world"?! If this passes then we may have to seriously consider relocating not just to another state, but another country as this is unacceptable and disgusting.
