House Committee On Judiciary

Measure, Appointment or Topic:

HB4145

I strongly oppose 4145. It breaks convention by trying to force legislation through while there is already a case pending before the Oregon Supreme Court.

But, beyond that it's terribly unconstitutional. It tries to ban critical gun components as if the protection of the constitution doesn't include certain parts the state doesn't like.

It creates unnecessary legislative red tape and increases fees, creating a financial barrier for low income communities. The very communities that have the greatest need for self defense.

Everything about this bill is terrible and it should be relegated to the trash bin.
