

Submitter:

Maryssa Stumpf

On Behalf Of:

Committee:

House Committee On Judiciary

Measure, Appointment or Topic:

HB4088

I support this measure, as I believe healthcare is a human right and that all people, regardless of where they reside, deserve access to healthcare without fearing that the government will retaliate against them for doing so. Oregon should ensure that other states cannot interfere with the healthcare offered to people in our state and also offer protections to both patients and healthcare providers— so that these decisions can be made based on what is best for the patient, and not in fear of unjust laws elsewhere.
