HB4088

**WE NEED THIS BILL.**

All women should have reproductive health care, whether its access to contraceptives, care during a pregnancy, fertility services, or care for STIs. We must not put this at risk.

We also must protect those in our state (or those who come to us for help). Trans men/women have the right to live their lives the way they feel they were meant to live, just like the rest of us. If our state does not protect them, who will?

I live in this state because I have chosen a place where we can all feel safe and live (or not) our lives the way we choose. I want to keep it that way.

Please support this bill.
