Committee:

House Committee On Judiciary

Measure, Appointment or Topic:

HB4088

I do not believe our tax dollars should pay for gender reaffirming surgery or for illegals. And the funds for abortions in emergency only.

In my own experience these funds should be set aside for people of low and middle income, to help pay for procedures not covered under medicaid and medicare.

Instead of adding to the burden in spending million on sexual dysphoria. These people can not accept themselves and need counseling not counseling by

Continuing the dysphoria. Without treating the underlying issue which is why do they not recognize the beauty in who they were born to be from birth. What caused the dysphoria that allows them to think being a different sex will solve the problem. May create more issues in the future. Instead of giving attention and praise, why not allow them to pay for it if it is meant to happen.

The illegals getting free health care is nothing more than giving them another reason to commit the crime of crossing the border. It is nothing more than giving free benefits for a vote. If we can not give something of value to sign a referendum or recall then why should we give thousands of dollars in healthcare. When those dollars could give our senior citizens better healthcare, the disabled equipment to help them, that is currently not approved, or services readily available for our veterans.
