Committee: House Committee On Judiciary
Measure, Appointment or Topic: HB4145
Greetings Judicial Committee,

I strongly oppose HB4145. This will not stop crime at all. Criminals don't obtain guns legally. Only law-abiding citizens do. This does not stop or prevent suicide. If someone intends to commit suicide, they will do so by other means such as rope.

HB4145 is a complete slop job bill intent, deliberately, to deny democracy. The grammar is horrible; misspellings and incomplete sentences say everything that this bill was a slop job. Further, it never went through work session as required and already had its first reading before testimonies could be offered or submitted, which was not allowed through the weekend leading up on February 2nd, and registering was not acceptable until the afternoon, only couple hours before first testimonies on this.

Additionally, this also excludes the State Supreme Court decision and it's time, further denying democracy. Since when was the Judicial Branch, that is supposed to be equal branch of government with Legislation and Executive Branches. To that, this would also waste over \$7 million tax dollars just to go up in flames.

Further, this also allows personal identifying info to be made public in a registry, that is illegal, and without warrant. No one needs to know what I have. Further, it sets up where the bureaucracy can dictate who is allowed based on anything, even so much as wearing flannel.

The only Constitutional Right is the 2nd Amendment in which people have to pay to exercise it by this means. At that point, it's not a right and permits only deny the liberty. If this allowed, then should not be complained if background checks, exams and registration is put on the person registering to vote, speak or attend church and put the Constitution up for sale.
