House Committee On Judiciary

Measure, Appointment or Topic:

HB4138

Law enforcement should not be masked and should have identifying information. Without that, it are given anenimity to people of power that can abuse, and misuse their power.

Allowing masked individuals also ups the blodness of those that impersinate law enforcment, that has already been witnessed.

People are being taken from their homes, off the streets, killed, with no warrent, reason or threat.

If stopped on the street by a masked individual and told do something, how do you know that is law enfrocement? Who they are? Who they work for? How can yoy trust what thst person says is true? Why are they hiding?

Voting in opposition will contiune to break the crumbling trust citizens have with law enforcement.
