Committee:

House Committee On Revenue

Measure, Appointment or Topic:

HB4134

HB 4134 adversely affects small businesses in the hospitality industry that are still trying to offset the damages that the COVID-19 years did to our livelihoods. Creating deleterious taxes in an industry that has already been crushed by several years with nearly zero income is not only poor timing, it is cruel and tone-deaf to the struggles of small businesses in the state of Oregon.

I am not supporting this bill and I hope you and whoever reads this will consider the ramifications that piling fees and taxes have already had on commerce in the state of Oregon. This is not a partisan issue. It is an issue with the division between legislation and the reality of trying to successfully conduct small business in Oregon. Help us out and turn this down!
