

Submitter: Alexandra Chavez-Ross

On Behalf Of:

Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB4088

I firmly oppose HB 4088. I am part of one of the families that have been greatly affected by this ideology and medical malpractice. The HHS has pronounced itself against this with important and sustainable research. The same has happened in several European countries that supported them even before the USA. Passing this bill will only protect doctors and organizations from accountability in the near future.
