House Committee On Revenue

Measure, Appointment or Topic:

HB4125

The state of Oregon is completely out of touch and corrupt. They can't manage the funds they already have using every excuse to increase taxes instead of providing any kind of relief or accountability. Under no circumstances should the kicker be touched. This is just another "emergency" being pushed through as a money grab that I'm sure if happens once will continue when Oregonians are struggling. We already blocked the last ridiculous tax hike now this money grab. The workers clearly are not being thought about by their terrible leadership. efforts should be put in to making things more affordable and better for its citizens not robbing them.
