

Submitter:

Alexandra Parker

On Behalf Of:

Committee:

House Committee On Revenue

Measure, Appointment or Topic:

HB4134

Dear legislators,

I strongly urge you to pass this tax to protect our natural world. Oregon is home to diverse and amazing plant and animal life. They make Oregon the special state that it is. They are important to our economy and to our souls. We rely on them for more than we even currently understand. But they are in trouble. Habit loss and fragmentation, disease, climate impacts are hurting our natural world. Passing this tax would make a huge impact in restoring, helping, and protecting it. It would also bring revenue to create meaningful jobs in natural restoration and more. Please vote to support this measure and pass this tax. We need it for our future.
