Measure, Appointment or Topic:

HB4145

Each new hurdle you put in place for firearms ownership is a hurdle that the elderly, those that are marginalized, and those that have no other option to defend themselves can't overcome.

The second amendment was written with those exact people in mind. Not the strong and the able, but those that need an equalizer to those that would cause them harm.

I would ask that you reconsider your continued push to make laws that are not followed by criminals and prohibit abiding citizens from exercising their inalienable right to self defense.
