Committee:

House Committee On Judiciary

Measure, Appointment or Topic:

HB4145

This measure, just like M114, is so poorly thought out. Raising the permit to purchase price only becomes a classist system where the poor cannot afford a constitutional right to defend themselves. In an era where fascism and racism is growing exponentially, more are wanting to find tools to defend themselves. The bill also allows exemptions for all current or retired law enforcement. If a regular citizen can't have standard capacity magazines (that themselves are common use since the 1900s) why should a retired police officer? Why does a police officer need standard mags if the citizens they are supposedly here to protect cannot?

Having to prove when you purchased magazines is also one of the dumbest ideas I've ever heard. Oh yes, let me carry around receipts from years if not decades back for something. Do you carry receipts from your last set of tires on you? How about the last lightbulb you bought?

These bills keep getting pushed by people who have no concept of firearms and their only experience is watching Arnold Schwarzenegger in action movies.
