Committee:

House Committee On Judiciary

Measure, Appointment or Topic:

HB4088

I support legislation that puts firm and clear protections in place to keep reproductive healthcare and gender-affirming care between doctors and patients! The state and federal government have no right to infringe upon, dictate, or I sweet themselves in what should be private and protected matters between doctors and patients. This is healthcare. Lawmakers and voters politicizing these issues for control and to score "culture war" points must be stopped and our citizens must be secure that our human rights are being protected.
