House Committee On Judiciary

Measure, Appointment or Topic:

HB4088

I am submitting testimony to support gender-affirming care and to protect women seeking reproductive services, whatever they may be, from federal interference. My two children have a step sibling who transitioned from female to male in VA and received excellent care. Their step sibling is much happier as a male and suffered for years feeling like he was in the wrong body. I have received excellent medical care my entire life, including access to birth control, abortion, labor and delivery, pap smears and mammograms. I hope that every girl and woman who needs access to reproductive services receives it without interference. The government should not legislate women's bodies. Thank you.
