

I am writing to oppose HB 4125. It is impossible for me to comprehend why the legislature cannot seem to grasp a basic budgetary concept that it is unsustainable to continually spend more than the revenue coming in and then repeatedly go to the taxpayers for more money. Well we the people have exhausted our funding for this folly. You already get to keep two percent of the excess funds, a larger margin than most households have. Now you want to take more of our money to fund one of the worst education systems in the country and the most poorly managed and generous public employee pension plans in the country. To both concepts I say resounding NO!
