

ABSOLUTELY NOT!

Oregon is already one of the highest tax states in the nation for its residents. Most of us that are not getting any type of earned income tax credits or government assistance are barely surviving paycheck to paycheck. Oregon cannot keep trying to tax its way out of its budget shortfalls.

Oregon needs to prioritize spending, and that priority needs to be beneficial to oregonians as a whole and not too small select groups. We need to stop with these exorbitantly expensive pet projects and get back to budgeting the basic fundamentals. We're one of the highest States in taxes but rank almost dead last in education. That is embarrassing. Oregon needs to get with the program and follow federal guidelines if they expect Federal tax subsidies.

I am vehemently against a sales tax. We already pay income tax, and personal property tax. As of 2026 we're even taxed to write an inner tube down the river!

NO ON SALES TAX!
