HB4088

I fully support this legislation. Reproductive care is health care. I don't understand why so many would limit health care specifically for women, or why they're so eager to politicize it. We need this bill and we need it now, especially with the federal government so determined to restrict and control health services for women. You can ensure that women in Oregon are not treated like political pawns, slaves, chattel, or anything else. Women are full human beings just like men and deserve unfettered health care just like men.
