Committee:

House Committee On Judiciary

Measure, Appointment or Topic:

HB4088

I fully support this measure. Reproductive care is health care, and health care should always and only be a matter between a person and their doctor, whatever their situation or gender. This bill shouldn't be necessary, but it is very necessary. We need this bill and we need it now, especially with the federal government's determination to restrict and control health care for women for political reasons. You can help protect Oregonians by passing this bill. Women are actual human beings just like men are, and should have unfettered access to health care just like men do.
