On Behalf Of:

Committee:

House Committee On Judiciary

Measure, Appointment or Topic:

HB4088

I submit this testimony to encourage you to support HB4088 to protect the private medical information of women and Oregonians receiving gender affirming healthcare. Healthcare decisions must remain between patients and their healthcare providers and is not the business of the government.

Already to receive gender affirming care patients often spend years on waitlists, have required therapy sessions and go through a long process as it is. Adding further stigma and fear to this lifesaving care is dangerous and unconscionable.

Please vote yes on HB4088.
