Bryan Watson

On Behalf Of:

Committee:

House Committee On Transportation

Measure, Appointment or Topic:

HB4007

HB 4007 is important to our community safety, especially in the Metro areas. Codifying Micro Mobility for Clear and Consistent Rules for E-bikes, Scooters, and Other Micromobility Devices is a need I see directly as I commute daily across the metro area. It will help encourage more Micromobility use cases, which in turn will increase Mass Transit use cases, as Micromobility is being seen more and more within Multi-Modal transit use of the Bus\Max.

Reducing Unsafe and Illegal Vehicles and Batteries as written in HB4007 is needed as many parent's are caught unaware of the danger of illegal e-bikes, thinking all electric micromobility devices are just as safe as normal bikes and not realizing their child now has a device capable of speeds higher than 28 Mph.

Please support moving this forward,

Bryan Watson
