Committee:

House Committee On Revenue

Measure, Appointment or Topic:

HB4125

Oregon has the dubious distinction of being one of the highest tax rates in the nation while simultaneously having one of the worst track records in the nation for outcomes. More money is clearly not the solution.

Confiscating more from Oregon families will drive away more businesses and families which will result in less revenue to run the state. The government needs to eliminate corruption and graft like we have seen in the Portland PFA tax before asking us for another dime.
