

Submitter:	Kim Tyree
On Behalf Of:	HB 4054
Committee:	Joint Committee On Information Management and Technology
Measure, Appointment or Topic:	HB4054

We support HB 4054. There should not be a mechanism that the insurance companies can downcode claims without talking to the health care provider. The instances where that has happened has had to be appealed, as the insurance company was wrong. It is a long drawn out process that affects our cash flow. We already have enough trouble getting paid for all clean claims as it is. Please protect the health care in Oregon by supporting this measure.
