It is appalling that as a citizen my entire life of Oregon that so called college educated people get voted in and simply can not balance a budget or track expenditures correctly as far as they keep going to the people to raise taxes due to wasting existing fund - don't even get me started on money going to illegal food and housing, that one is one the chopping block next. We are taxed on everything from property, water, electric, gas, phone, internet and fuel. The madness stops this year. We are awake and voting.
