Committee:

House Committee On Judiciary

Measure, Appointment or Topic:

HB4088

I oppose legislation that restricts access to information about "gender affirming care" that is critical to understanding the impact of these interventions on the public health. Activists have successfully hijacked our medical societies who are prescribing treatments based on ideology, not science. It is important to follow the outcomes of these treatments so that the public, researchers, and doctors can see for themselves the disastrous consequences of these procedures.
