Committee:

House Committee On Transportation

Measure, Appointment or Topic:

HB4007

I am an eBike rider who uses my Class 3 eBike as my primary means of transportation. This measure will improve eBike safety by regulating eMotos disguised as eBikes. This distinction has given eBike riders a bad reputation when it's truly those with electric motorcycles that don't have to be pedalled that need to be on the road rather than on bike paths.

I also believe that allowing younger riders to ride eBikes helps those who are unable to ride as quickly due to physical inability. Allowing kids to be able to get around on their own helps their independence allowing them to go to the doctor, school, or to get groceries safely.
